

Year 2 Spring 1 Project homework – Moon Zoom

Our topic this term is called ‘Moon Zoom’, which means we will be looking at what can be found in space and astronauts who have explored the moon and space.

Search for space themed books at home or online. Read and talk with an adult about the books you find.	With an adult, search the web for fascinating space facts and make your own Space Fact Book.	Ask an adult to help you find the names of all the people who have walked the Moon. There are 12 of them! Record a fact about each of them in your ‘Space Fact book’.	Use an app to find constellations, planets and stars in the night sky. Which constellation is the easiest to recognise? Which star is the brightest?
With an adult, explore the Hubble Telescope website. Check out those amazing gallery images! Or, check out the International Space Station app (ISS) and see when it is over our country!	Imagine you’re an astronaut completing different space missions and make a mini book about your work.	Make a telescope from junk cardboard materials and sticky tape. Just before bedtime, use your telescope to look up at the stars. Can you see any wonderful star patterns in the sky? Grab a piece of paper and draw the pattern of stars you can see.	Can you make up your own space song or rhyme? Teach the song to your family and perform it. Send the video on Class Dojo.

Please complete **THREE** over the half-term and send them in as soon as they are complete. While restrictions are in place, the best way to submit your child’s homework is **to send a photo on ClassDojo**. You could also attach a photograph of a model, PowerPoint, Word document etc.

Tasks can be completed in a variety of ways - be as creative as you want!
