

# Reception Project Homework – What Can You See In Summer?

## Summer 2

Our topic this term is called ‘What Can You See in Summer?’ We will be learning all about planting and growing, the seaside and the season of Summer. We will also be learning about healthy eating and exercise.

|   |  |  |   |
|---|--|--|---|
| Create a rainbow representation (7 colours) by mixing primary colours to make secondary colours (green, purple, orange).                              | Write a list of all of the changes which happen in Summer. Draw a picture to go with it.   | Find a variety of plastic bottles/containers. Can you find out which one holds the most liquid?                          | Write a set of instructions of how to plant a sunflower. You could maybe then plant your own sunflower and watch it grow.   |
| Take part in an exercise of your choice. Then talk about how exercise helps us to keep healthy. Can you feel how the exercise has affected your body? | Some foods are good for our teeth and some are not. Draw pictures of food that are good for your teeth and label them. Repeat this for foods that are not good for your teeth.<br> | Can you go to the beach and collect as many items as you can? Can you make a picture using the items you have collected. | Find out what this season is called. Can you make a weather chart for the week and look at the different changes in weather. Can you compare it with your last weather chart if you made one from Spring. |

Please complete **three tasks** and bring them in as soon as you can so we can marvel at your creations and pop them on display. Feel free to take photographs too and send them in on Class Dojo. If you think of your own ideas that aren’t listed above, that’s great! You can also help a sibling with a project homework task. Tasks can be completed in a variety of ways - be as creative as you want!
